

As a guest I want to be able to register so they have my personal info like name and ID and my reservation info.
As a guest I want to be able to reserve rooms so I wouldn't have to refer to reception.
As a guest I want to be able to cancel my reservation so I won't lose my money.
As a manager I want to access the guests and personnel information so I know who stays in the hotel and I can handle any possible problem or see my personnel info.
As a manager I want to be able to edit guests and personnel info so if some info was wrong I can correct it or if I wanted to fire someone I would be able :) .
As a guest I want to know how much I'm spending so I can handle my budget.
As a manager I want to be able to give a list of tasks that my personnel should do so they know what to do and doesn't get confused.
As a personnel I want to be able to see the list of tasks I should do so that I don't waste my day and my manager doesn't get angry.
